Dear Samantha,

I am delighted to inform you that the Paleontological Society Student Research Grants Committee has selected you as a 2022 Student Research Grant recipient. Specifically, you have received the Leo J. Hickey Award, which carries with it a total award of \$1,200. Congratulations!

To receive your award funds, please email your physical mailing address to Dr. Jonathan Hendricks ([Treasurer@paleosoc.org](mailto:Treasurer@paleosoc.org)), Treasurer of the Paleontological Society, as soon as possible. Dr. Hendricks will use your mailing address to initiate the payment process with the Paleontological Society's business office, MCI. Dr. Hendricks will provide you with additional information regarding this process. Payment will likely take several weeks. Our preference is to make electronic transfer of funds directly to your bank account. If you prefer to receive a paper check, please let Dr. Hendricks know that this is the case when you first contact him and also provide the address where the check should be sent. Please expect the payment process to take several weeks.

Please note that you are expected to apply all Paleontological Society grant funds toward the project that you proposed. Also, please acknowledge the support of the Paleontological Society, including the specific name of your award, in all publications and presentations that result from your sponsored research.

As your project progresses, please keep in mind that the Paleontological Society is eager to showcase your research. Upon completion of your project, please provide me with a short summary of the project highlights, written in a manner that will be accessible to all paleontologists. Please attach one or two relevant images, such as field photos or figures. News releases and press clippings may also be submitted.

On behalf of the Paleontological Society Student Research Grants Committee, I wish you continued success in your research!

Sincerely,

Surangi W. Punyasena  
Chair of the Paleontological Society Student Research Grants Committee  
Associate Professor, Plant Biology  
University of Illinois, Urbana-Champaign
