

Is yaupon holly an effective and safe way to induce cancer cell death?

Yaupon Holly New Leaf Extract 48hr Treatment

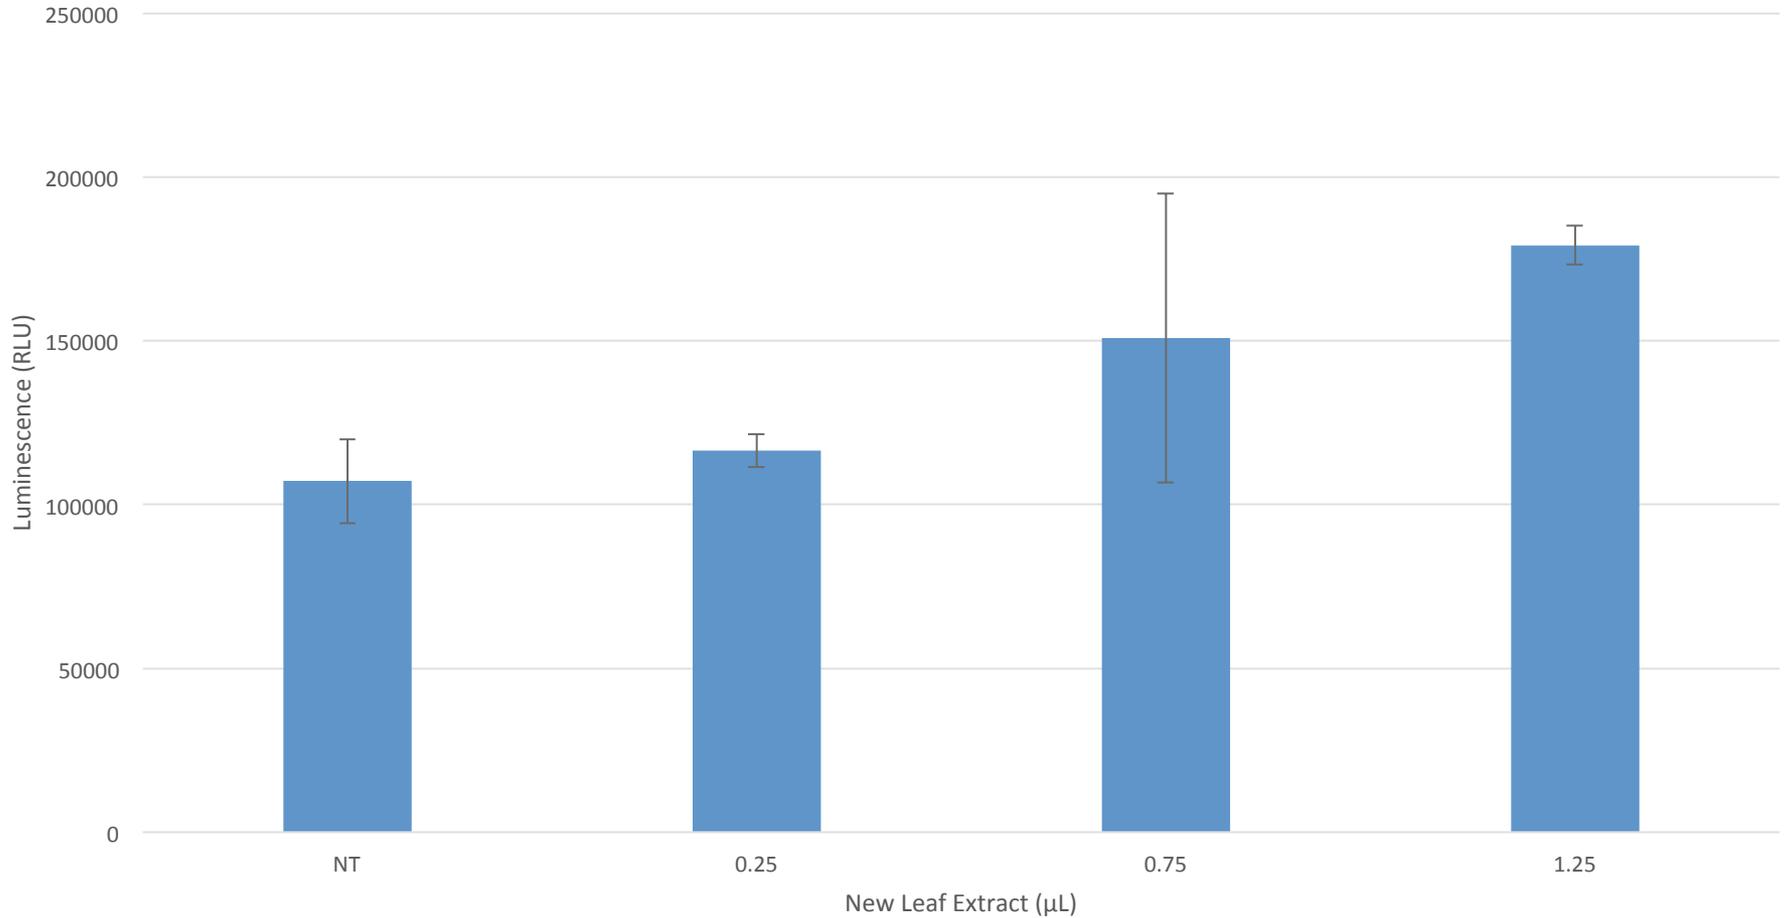

Figure 1: Bioluminescent Metabolic Assay: ATP production in human nonmalignant fibroblast cells treated for 48hr with new leaf Yaupon Holly extract.

Yaupon Holly Old Leaf Extract 48hr Treatment

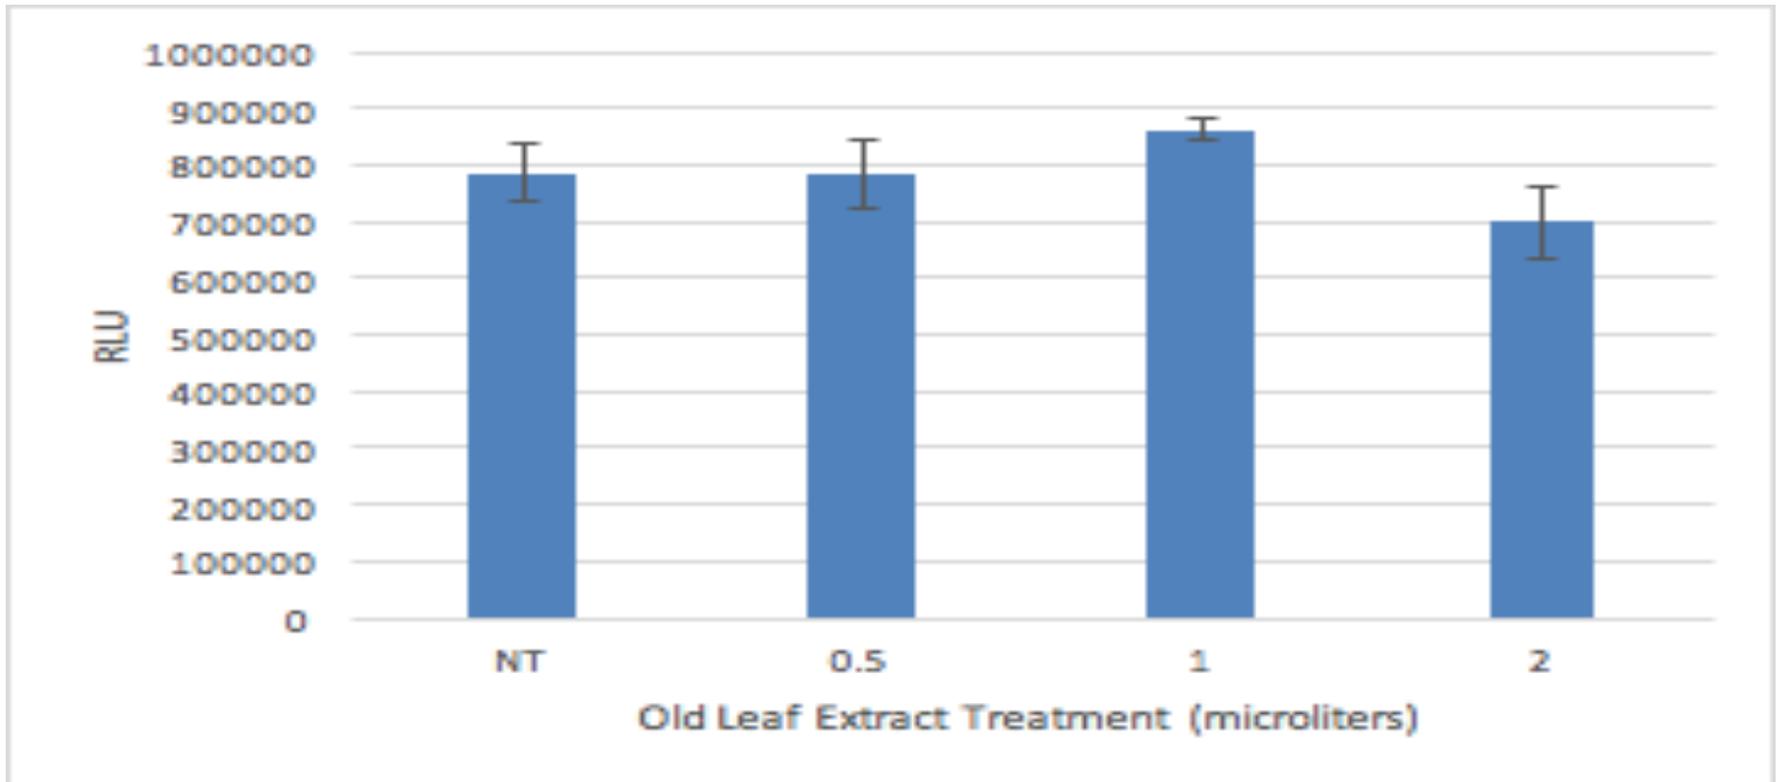

Figure 2: Bioluminescent Metabolic Assay: ATP production in human nonmalignant fibroblast cells treated for 48hr with old leaf Yaupon Holly extract.

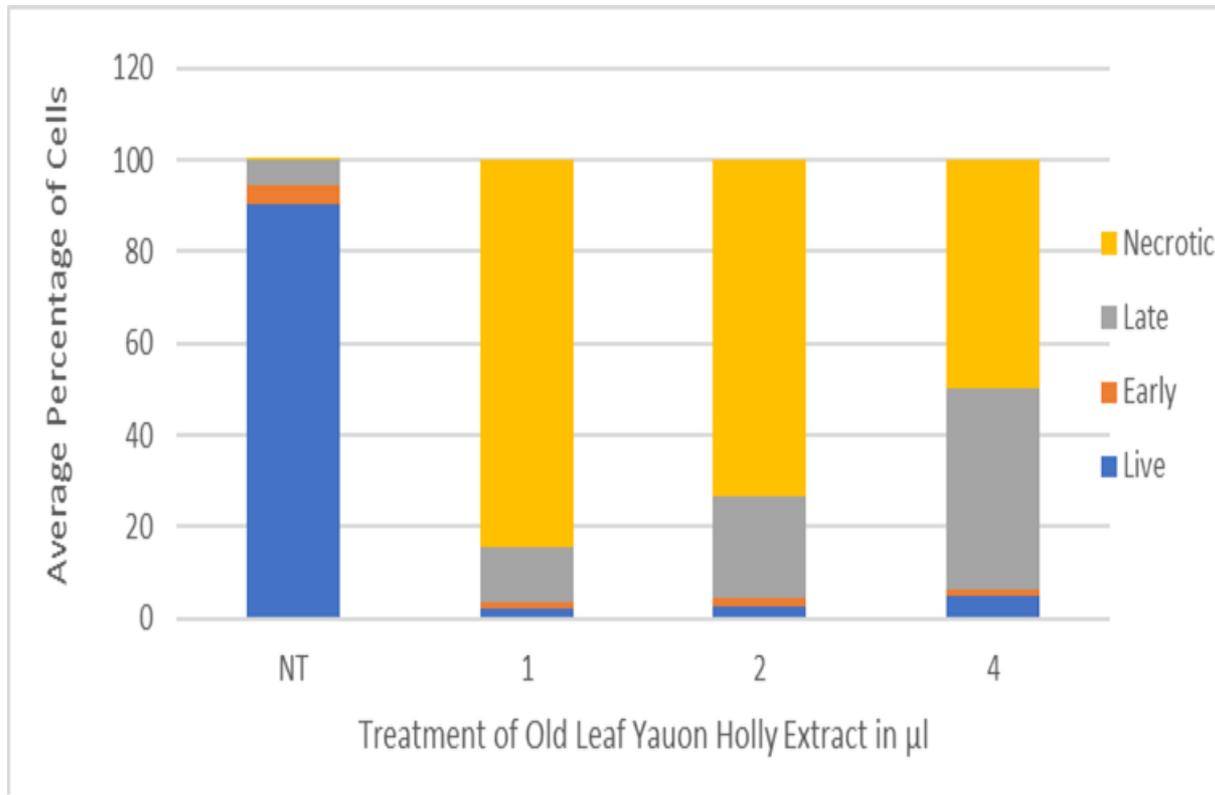

Figure 3: Annexin V flow cytometry data in human leukemia cells treated for 48hr with old leaf Yaupon Holly extract. Annexin V measures live cells, cells undergoing early regulated cell death, late regulated cell death and unregulated necrotic cell death.

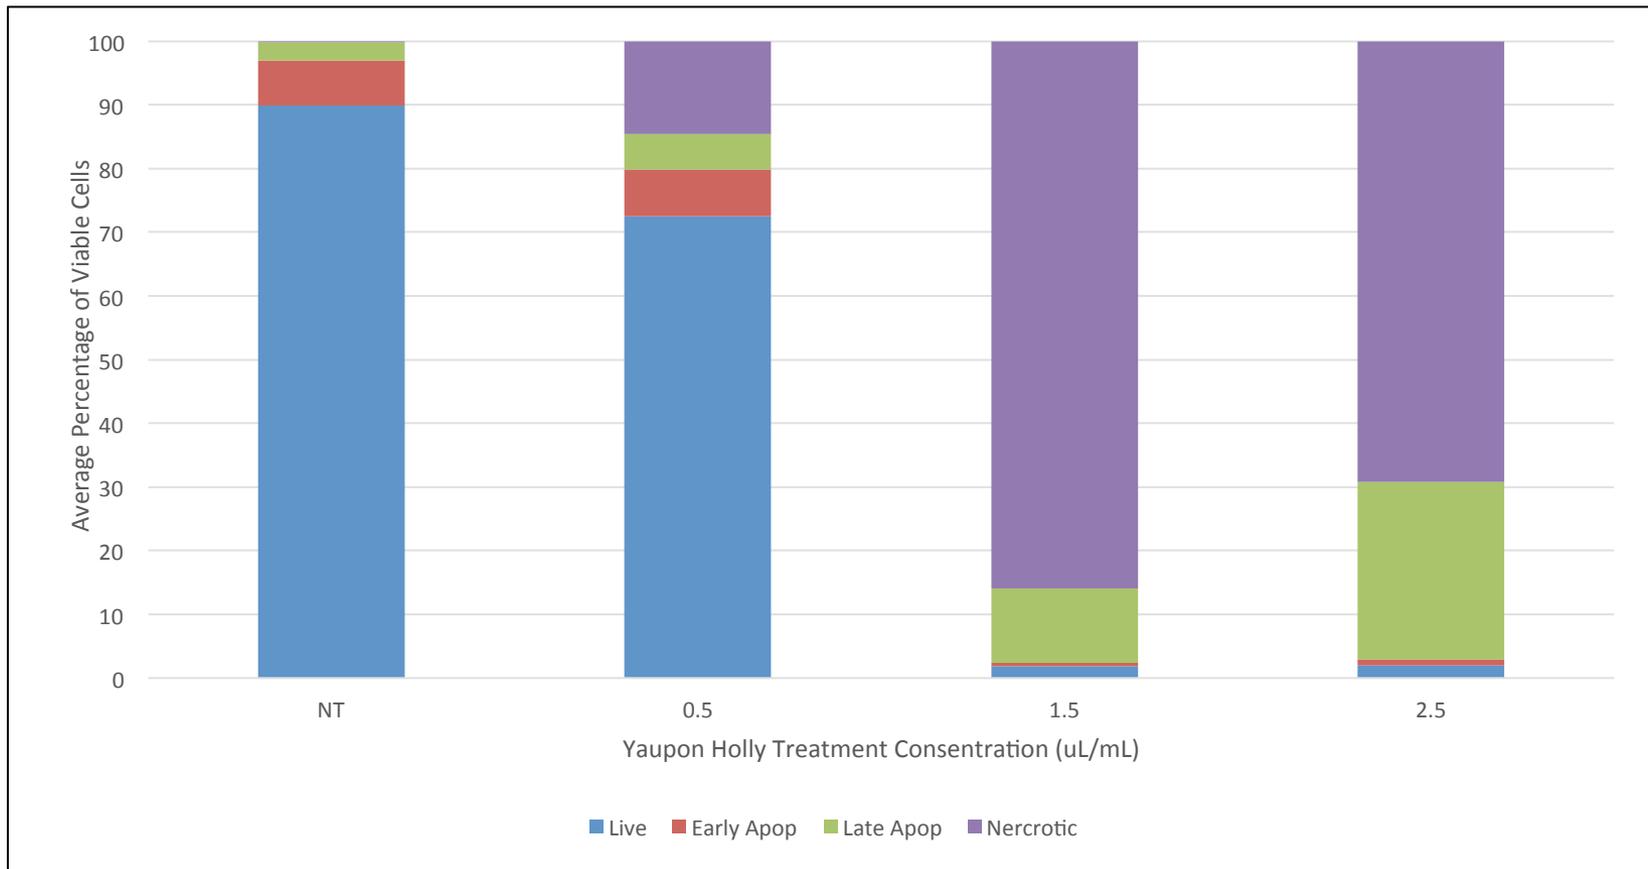

Figure 4: Annexin V flow cytometry data in human leukemia cells treated for 48hr with new leaf Yaupon Holly extract. Annexin V measures live cells, cells undergoing early regulated cell death, late regulated cell death and unregulated necrotic cell death.
