Re: Revision
Study Title: **Investigating Spatial and Object Perception in Blind and Sighted Persons**
Study #: TEN001

Expedited Review:

Revision of this study is approved. The study qualifies for expedited review under 45 CFR 46.110 (4, 6, and 7). The study team was updated by adding [REDACTED] and removing [REDACTED]. Phone numbers were updated on the protocol and all consent and assent forms to reflect new extensions for [REDACTED] and to clarify the listing of the "SKERI main line". The sIRB arrangement with [REDACTED] was formally documented via SKERI's IAA form and a relying site form.

Expiration Date: **January 30th, 2026**

An annual Continuing Review is required for all active studies at Smith-Kettlewell, regardless of enrollment status. A Continuing Review form will need to be submitted a minimum of one week prior to the expiration date of this study. If the Continuing Review is not completed by the expiration date, all research activity related to this study will be halted.

Modifications:

Any modifications to the consent form or protocol - including any change in source of funding - must be made in writing to the IRB. Any advertisements (including web information) must be submitted to the IRB prior to use.

Complications/Unanticipated Problems:

Please report immediately to the IRB any complications, untoward effects or unanticipated problems. If you are unsure as whether the effect requires reporting, feel free to contact Jillian Cellucci, IRB Administrator, by email at jcellucci@ski.org. You may also contact me at good@ski.org.

Sincerely,

William V. Good, MD
IRB Chair
